Editor-in-Chief: B. BOLIN
Editor: H. LEJENÄS
Executive Editor: M. SKÅRMAN
Address: TELLUS
Editorial Office
Arrhenius Laboratory
S-106 91 Stockholm, Sweden

Distributor: MUNKSGAARD International Publishers Ltd.
P.O. Box 2148
DK-1370 Copenhagen K, Denmark

Contents

Vol. 31
No. 1
February 1979

A. Buzzi and A. Speranza: Stationary flow of a quasi-geostrophic, stratified atmosphere past finite amplitude obstacles 1
K. Ya. Kondratyev, R. M. Welch, O. B. Vasilyev, V. F. Zhvalev, L. S. Ivlev and V. F. Radionov: Calculations of free atmospheric shortwave spectral characteristics over the desert (from the CAENEX-70 data) . . . 13
S. Hastenrath and W. M. Wendland: On the secular variation of storms in the tropical North Atlantic and Eastern Pacific 28
M. B. Baker, H. Harrison, J. Vinelli and K. B. Erickson: Simple stochastic models for the sources and sinks of two aerosol types 39
G. Crozat: Sur l'émission d'un aérosol riche en potassium par la forêt tropicale 52
D. C. Lowe, P. R. Guenther and C. D. Keeling: The concentration of atmospheric carbon dioxide at Bariong Head, New Zealand 58
U. Schmidt: The solubility of carbon monoxide and hydrogen in water and sea-water at partial pressures of about 10^{-5} atmospheres 68
A. Palumbo: Evidence for interfacial effects between oceanic and atmospheric lunar tides 75
J. H. Middleton: Times of rise for turbulent forced plumes 82

Vol. 31
No. 2
April 1979

G. Hartjenstein and J. Egger: Linear parameterization of large-scale eddy transports 89
C. Magono, T. Endoh, F. Ueno, S. Kubota and M. Itasaka: Direct observations of aerosols attached to falling snow crystals 102
T. P. Ackerman: On the effect of CO_2 on atmospheric heating rates . . . 115
H. D. Freyer: On the ^{13}C record in tree rings. Part I. ^{13}C Variations in northern hemispheric trees during the last 150 years 124
F. Schott and D. Quadfasel: Lagrangian and Eulerian measurements of horizontal mixing in the Baltic 138
E. Paschini and E. Salusti: On the Green's function of Laplace's tidal equation, an application to the Northern Adriatic Sea 145
A. I. Leonov, YU. Z. Miropolsky and R. E. Tamsalu: Nonlinear stationary internal and surface waves in shallow seas 150
H. Hukuda: Solitary Rossby waves in a two-layer system 161

Short Contributions
A. Henderson-Sellers and A. J. Meadows: The zonal and global albedoes of the earth 170
V. P. Aneja, J. H. Overton, Jr., L. T. Cupitt, J. L. Durham and W. E. Wilson: Direct measurements of emission rates of some atmospheric biogenic sulfur compounds 174
G. Cortecci, P. Noto and B. Tonarelli: Tritium and oxygen profiles in the eastern Mediterranean 179

Vol. 31
No. 3
June 1979

R. D. Cess and J. C. Wronka: Ice ages and the Milankovitch theory: A study of interactive climate feedback mechanisms 185
C. Nicolis: The effect of solar output, infrared cooling and latitudinal transport on the evolution of the earth's climate 193
P. Langley and D. R. Davies: Numerical experiments with planetary scale mountain barrier waves in a simple model 199
D. V. Hoyt: Pyrheliometric and circumsolar sky radiation measurements by the Smithsonian Astrophysical Observatory from 1923 to 1954 . . . 217
E. N. Lorenz: Numerical evaluation of moist available energy 230
K. E. Taylor: Formulas for calculating available potential energy over uneven topography 236
E. Holopainen and P. Nurmi: Acceleration of a diffluent jet stream by horizontal sub-grid scale processes—an example of a scale interaction study employing a horizontal filtering technique 246
S.-U. Park and L. Mahrt: Oscillating, stratified boundary layers driven by surface temperature variations 254
H. Rodhe and A. Björkström: Some consequences of non-proportionality between fluxes and reservoir contents in natural systems 269

Vol. 31
No. 4
August 1979

S. K. Paul, A. M. Selvam and Bh. V. Ramana Murty: An experimental investigation of the influence of electric field on the collision-coalescence of water drops 279
S. Sadasivan and S. J. S. Anand: Chlorine, bromine and iodine in monsoon rains in India 290
S. A. Penkett, D. H. F. Atkins and M. H. Unsworth: Chemical composition of the ambient aerosol in the Sudan Gezira 295
H. D. Freyer: On the ^{13}C record in tree rings. Part II. Registration of microenvironmental CO_2 and anomalous pollution effect 308
H. B. Singh, L. Salas and H. Shigeishi: The distribution of nitrous oxide (N_2O) in the global atmosphere and the Pacific Ocean 313
B. Jähne, K. O. Münnich and U. Siegenthaler: Measurements of gas exchange and momentum transfer in a circular wind-water tunnel . . . 321
L. P. Røed: Storm surges in stratified seas 330
U. Svensson: The structure of the turbulent Ekman layer 340
P. G. Baines: Observations of stratified flow over two-dimensional obstacles in fluid of finite depth 351

Short Contribution
U. Cederlöf: On the transient state of wind-driven coastal currents . . . 372

Vol. 31
No. 5
October 1979

A. Wiin-Nielsen: Steady states and stability properties of a low-order barotropic system with forcing and dissipation 375
J. Rinne and K. Frisk: The development of the analysis error of the 500 mb height, 1946–1969 387
R. A. Reck: Comparison of fixed cloud-top temperature and fixed cloud-top altitude approximations in the Manabe-Wetherald radioactive-convective atmospheric model 400
H. C. Davies and R. A. de Guzman: On the preferred mode of Ekman-CISK 406
A. Zangvil: Temporal fluctuations of seasonal precipitation in Jerusalem . 413
H. M. Liljestrand and J. J. Morgan: Error analysis applied to indirect methods for precipitation acidity 421
J. Fishman, S. Solomon and P. J. Crutzen: Observational and theoretical evidence in support of a significant in-situ photochemical source of tropospheric ozone 432
R. L. Hughes: On the dynamics of the equatorial undercurrent 447
J. W. Miles: On internal solitary waves 456

Short Contribution
A. K. Yadav and G. P. Mishra: Chemistry of rainwater and its contribution to nutrient input in forests of central India 463

Corrigendum
P. D. Weidman: Corrigendum to the paper Internal solitary waves in a linearly stratified fluid 465

Addendum
W. H. Raymond and G. V. Rao: Addendum to the paper: Boundary layer dynamics of a decaying vortex core 468

Vol. 31
No. 6
December
1979

J. Oerlemans: A model of a stochastically driven ice sheet with planetary wave feedback 469
G. Hänel and B. Zankl: Aerosol size and relative humidity: Water uptake by mixtures of salts 478
P. E. Merilees: On the kinematic properties of the -3 law for kinetic energy 487
D. G. Vincent and T. W. Schlatter: Evidence of deep convection as a source of synoptic-scale kinetic energy 493
H. Riehl and J. Meitín: Energy transformations in the subcloud layer of hurricane Gladys (1975) 505
M. Rajaram, B. P. Singh and H. V. Gupta: Tropopause height and solar activity 515
F. Parungo, E. Ackerman, W. Caldwell and H. K. Weickmann: Individual particle analysis of Antarctic aerosols 521
S. E. Schwartz: Residence times in reservoirs under non-steady-state conditions: Application to atmospheric SO_2 and aerosol sulfate 530
F. Chew: Horizontal divergence, acceleration and curvature change, a diagnostic equation with applications 548
D. Nof: On man-induced variations in the circulation of the Mediterranean Sea 558
